Introduction

The FIS Loan Service Suite Data Hub is available to clients, providing secure, direct, and high-performance access to Portfolio Snapshot, Cashflow Snapshot, and related Compliance Datasets.

The key benefits include:

- Providing fast, direct, and comprehensive access to all your FIS Loan Services Suite data.
- With a star schema data model, your information is organized for efficient analytics and easy reporting.
- With Snowflake, you retrieve normalized data and experience high performance with large datasets.

FIS Loan Services Suite Data Model and Flow Overview

Data Model Architecture

FIS Loan Service Suite data is replicated from the FIS CDO Suite into your dedicated Snowflake client database. The data is set up using a star schema, with one table connected to several smaller tables. This makes it easier to analyze and report on the data quickly.

Data Flow

- Data is generated and approved in CDO Suite and replicated hourly into your Snowflake instance.
- Give secure read-only access to the data in Snowflake.

Company or Deal Setup

- **Company Setup:** Ensure your company is registered in the CDO Suite.
- **Deal Linking:** Deals must be linked to your company and have a valid "Role in Deal":

Role in Deal Code	Role in Deal Description
CM	Collateral Manager
FA	Fund Administrator

- Active and inactive deals are available in Snowflake.

Portfolio Snapshot Data

- **Definition:** Point-in-time datasets detail such as balances, contracts, and referential data.
- **Identification:** Each snapshot is identified by a unique ps_id.
- **Classifications:** Only approved snapshots with the following codes are available:

Code	Description
MR	Monthly Report
INT	Interim Report
PR	Payment Report
IR	Effective Date Report
HR	Hypothetical Report
ER	Escrow Report
OR	Original Report
QR	Quarterly Report
1IT	1st Interim Target
2IT	2nd Interim Target
LA	Last Approved Snapshot
DIN	Daily Initial
DPT	Daily Pre-trade
WK	Weekly Report

- **Set up:** You can create Portfolio Snapshots manually or via automation.

Cashflow Snapshot Data

- **Definition:** Point-in-time cash datasets that include account summaries and unrecorded cash.
- **Identification:** Each snapshot is identified by a unique cs_id.
- **Approved Classification:**

Code	Description
APR	Approved - Cashflow

- **Set up:** Created in CDO Suite and made available in Snowflake upon approval.

Ratings, Market Prices, and Compliance Tests

- **Ratings/Market Prices:** Require an appropriate rating agency or pricing subscriptions for your company.
- **Compliance Tests:** The Compliance test results are enabled for display in Snowflake. The compliance team will configure these in CDO Suite within the FIS Loan Services Suite Deal Dashboard.

Data Access Validation

- During onboarding, FIS validates that:
 - Portfolio/Cashflow Snapshots are accessible for approved IDs linked to your ENTITY_IDs.
 - Compliance test results and DEAL_TEST_IDs are visible.

FIS Loan Services Suite Data Model Details

Portfolio Snapshot and Cashflow snapshot data have been transferred into a dimensional data model as a part of the replication process from CDO Suite to Snowflake. This restructuring organizes the data more effectively and enhances its accessibility once it becomes available.

Dimension Tables

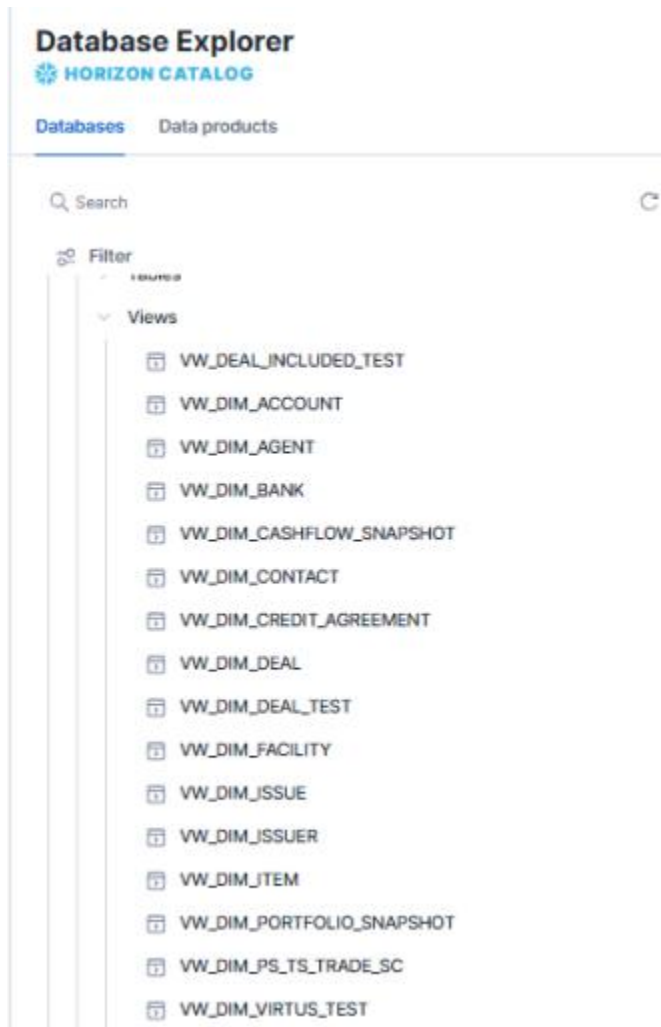

- FIS Loan Services Suite database contains logical dimensional tables that arrange data in logical hierarchies, making related information organized and easy to find.
The following dimensional tables are available:

Dimension Tables Table Views
VW_DEAL_INCLUDED_TEST
VW_DIM_ACCOUNT
VW_DIM_DEAL

VW_DIM_DEAL_TEST
VW_DIM_PORTFOLIO_SNAPSHOT
VW_FACT_PORTFOLIO_SNAPSHOT_TEST_SUMMARY
VW_FACT_PS_DEAL_DATA
VW_PORTFOLIO_SNAPSHOT_CASH_ACCOUNT_BALANCES

- **Navigation:**

- Go to SNOWFLAKE > VIRTUS_INFOMART > VIEWS.

- Each view provides Description, Contacts, Privileges, Columns (with metadata), Data Preview, and Lineage.

Working with FIS Loan Services Suite: Quick Start Queries

To help you get started, below are some Quick Start queries for the FIS Loan Services Suite. These queries are designed to provide fast access to key portfolio snapshot data, such as **compliance test summaries** and **cash account balances**.

Portfolio Snapshot Compliance

Test Summary - All Tests

Purpose: Retrieve the top 1000 compliance test summary results for all deals and portfolio snapshots. Each row represents a test within a portfolio snapshot.

```
SELECT TOP 1000
    ps.as_of_date,
    ps.ps_id,
    ps.ps_classification_code,
    ps.entity_id,
    d.deal_name,
    ts.test_name as test_name,
    ps.date_basis,
    ts.*
FROM
    APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_FACT_PORTFOLIO_SNAPSHOT_TEST_SUMMARY
    ts
JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.vw_dim_deal_test dt
    ON ts.deal_test_sk=dt.deal_test_sk
JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_DIM_PORTFOLIO_SNAPSHOT ps
    ON ts.portfolio_snapshot_sk=ps.portfolio_snapshot_sk
JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_DIM_DEAL d
    ON d.deal_sk=ps.deal_sk
JOIN APP_IDP_VIRTUS_UAT.VIRTUS_INFOMART.VW_DEAL_INCLUDED_TEST di
    ON di.deal_test_id=dt.deal_test_id
    AND (COALESCE(ts.coverage_id,0) = COALESCE(di.total_id,0) OR
    COALESCE(ts.coverage_id,0) = COALESCE(di.strat_id,0));
```

Test Summary - Failed Test

Purpose: Retrieve the top 1000 compliance test summary results that are **Fail** for all deals and portfolio snapshots. Each row represents a failed test within a portfolio snapshot.

```

SELECT TOP 1000
    dt.client_test_name as test_name,
    ps.ps_id,
    ps.entity_id,
    d.deal_name,
    dt.deal_test_id,
    ps.date_basis,
    ps.ps_classification_code,
    ps.as_of_date,
    ts.*
FROM
    APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_FACT_PORTFOLIO_SNAPSHOT_TEST_SUMMARY
    ts
JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.vw_dim_deal_test dt
    ON ts.deal_test_sk=dt.deal_test_sk
JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_DIM_PORTFOLIO_SNAPSHOT ps
    ON ts.portfolio_snapshot_sk=ps.portfolio_snapshot_sk
JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_DIM_DEAL d
    ON d.deal_sk=ps.deal_sk
JOIN APP_IDP_VIRTUS_UAT.VIRTUS_INFOMART.VW_DEAL_INCLUDED_TEST di
    ON di.deal_test_id=dt.deal_test_id
    AND (COALESCE(ts.coverage_id,0) = COALESCE(di.total_id,0) OR
COALESCE(ts.coverage_id,0) = COALESCE(di.strat_id,0))
    AND ts.test_result='Fail';

```

Snapshot Date Basis - Cash Account Balances

Purpose: Retrieve the top 1000 active cash account balances as of the portfolio **snapshot date basis**. Each row represents a cash account within a deal.

```

SELECT TOP 1000
    cab.account_id,
    cab.cash_account_name,
    cab.cash_account_type,
    cab.balance_amount,
    ps.ps_id,
    ps.entity_id,
    d.deal_name,
    ps.as_of_date,
    ps.date_basis
FROM APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_FACT_CASH_ACCOUNT_BALANCE cab
JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_DIM_PORTFOLIO_SNAPSHOT ps
    ON cab.portfolio_snapshot_sk = ps.portfolio_snapshot_sk
JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_DIM_DEAL d
    ON d.deal_sk = ps.deal_sk
WHERE cab.is_active = 1
    AND cab.cash_date_basis = ps.date_basis;

```

Snapshot Date Basis - Transaction date Basis

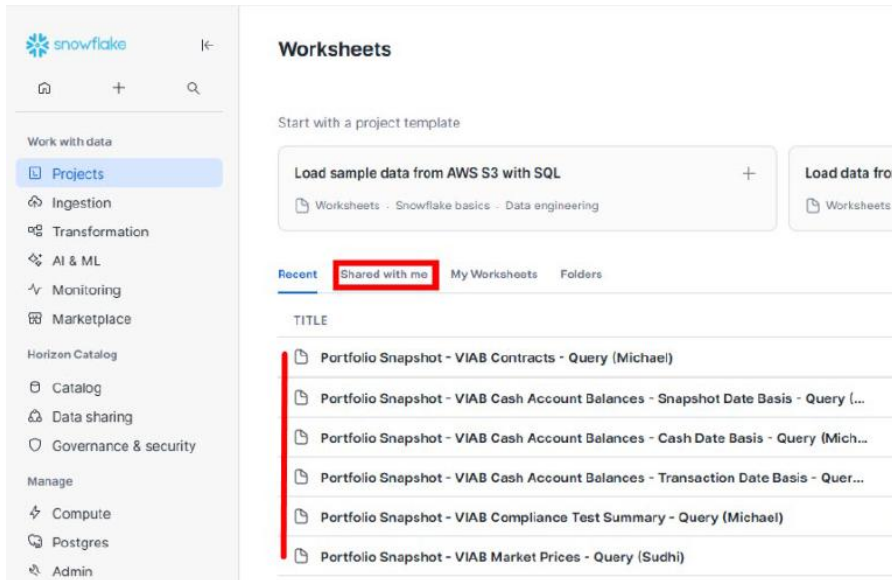

Purpose: Return the top 1000 cash account balances by transaction date for all deals and portfolio snapshots. Only snapshots run at activation time are included. Each row represents a cash account within a deal.

```
SELECT TOP 1000
  a.active_account,
  a.account_num as account_number,
  d.entity_id,
  d.deal_name,
  ps.ps_id,
  ps.as_of_date,
  a.account_name,
  a.currency_denominated,
  ab.principal_proceeds_amt,
  interest_proceeds_amt,
  miscellaneous_proceeds_amt
FROM
  APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_PORTFOLIO_SNAPSHOT_CASH_ACCOUNT_BALAN
  CES ab
  JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_DIM_PORTFOLIO_SNAPSHOT ps ON
  ab.portfolio_snapshot_sk = ps.portfolio_snapshot_sk
  JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_DIM_DEAL d ON d.deal_sk =
  ps.deal_sk
  JOIN APP_IDP_VIRTUS_SIXTH_STREET_UAT.VIRTUS_INFOMART.VW_DIM_ACCOUNT a ON ps.deal_sk =
  a.deal_sk
  AND ab.account_sk = a.account_sk
WHERE ab.deal_data_type = 'TRAN';
```

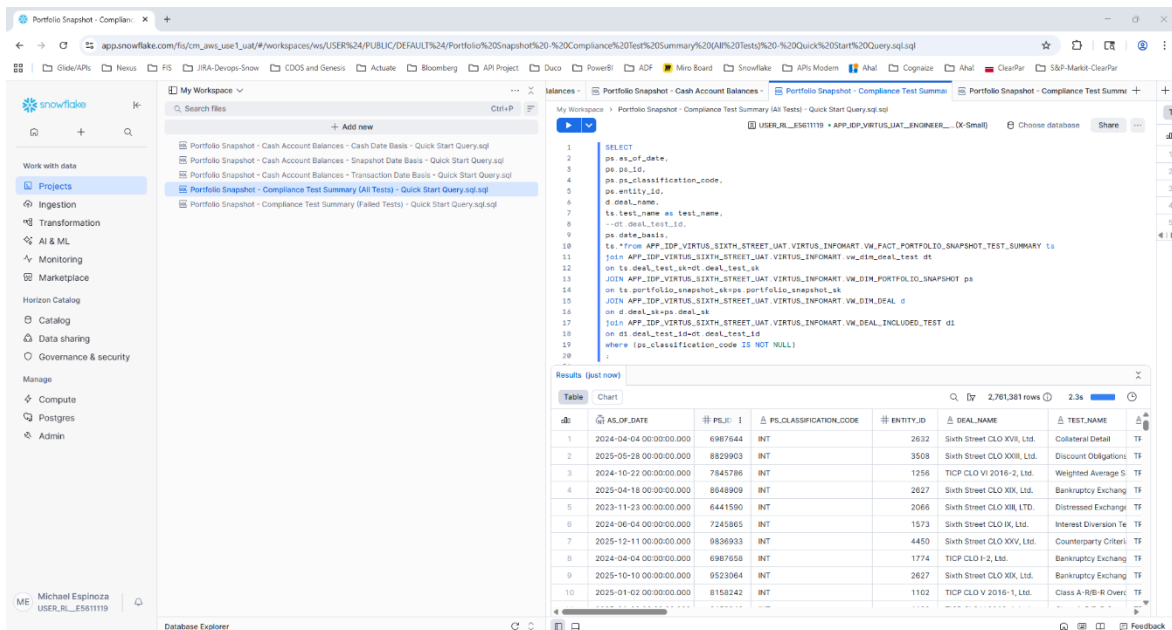

Accessing FIS Loan Services Suite

The following are the steps:

1. Log in to your Snowflake instance.
2. Navigate to Projects > Worksheets > Shared with me.

3. Select the relevant query.

4. Click the **Run** button to execute.

These queries provide ready-made access to common Portfolio and Cashflow Snapshot data layouts that are used by FIS Loan Services Suite clients.

Automation and Scheduling

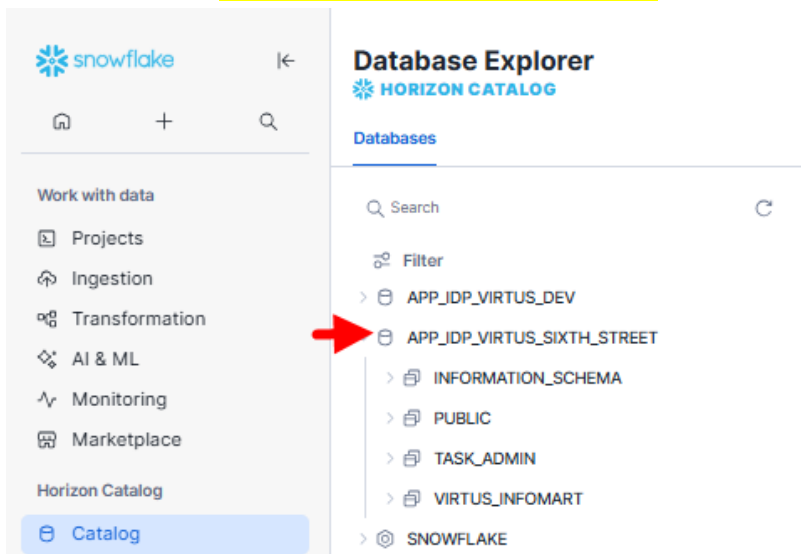

Snowflake offers tasks that allow you to automate and schedule query execution. For more information, refer [Snowflake Tasks Documentation](#)

FIS Loan Services Suite Database Structure

Data stored within a Sixth Street Partners database, which FIS Loan Services Suite shares with you via a client private listing.

Database Details

- **Database Name:** **APP_IDP_VIRTUS_SIXTH_STREET** (a unique client database name)

- **Structure:**
 - INFORMATION_SCHEMA
 - PUBLIC
 - TASK_ADMIN
 - **VIRTUS_INFOMART**

Replication Frequency and Time Series

- **Replication:** Database stores replicated data from the CDO Suite, which is hourly replicated.

- **Time Series Columns:**

- EFFECTIVE_START_DATE: Record's effective start.
- EFFECTIVE_END_DATE: Record's effective end.
- IS_CURRENT_RECORD: Boolean, indicates current status.
- IS_DELETE: Boolean, indicates if record is deleted.
- FACT_UPDATED_AT: Last updated timestamp.

Sixth Street Partners Portfolio and Compliance Guidance

Note: This section is very specific to the Sixth Street Partners client.

The key guidelines for Sixth Street Partners on Portfolio Snapshots and Compliance Test Results are:

- **Portfolio Snapshot Date Basis**

The deal portfolio snapshots are typically created on a Trade Date Basis, which is visible in multiple

locations in Data Hub within W_DIM_PORTFOLIO_SNAPSHOT.

The screenshot displays two interfaces. The top interface is the CDO Suite 'Portfolio Snapshots' page for 'Sixth Street CLO XX, Ltd.'. It shows a list of snapshots with columns: PS ID, Queue ID, Status, Description, Linked to Reporting Snapshot, As Of Date, Date Basis, Cash Date Basis, and Virt. A red arrow points to the 'Date Basis' column. The bottom interface is the 'Database Explorer' showing the 'VW_DIM_PORTFOLIO_SNAPSHOT' view. A red arrow points to the 'DATE_BASIS' column in the table.

PS ID	Queue ID	Status	Description	Linked to Reporting Snapshot	As Of Date	Date Basis	Cash Date Basis	Virt
10175820	7547441	Finished	Export Snapshot From: 02/01/2026 To: 02/16/2026 - Sixth Street CLO XX, Ltd. - Interim Report		2/16/2026	Trade Date Basis	Cash Date Basis	
10175776	7547396	Finished	Export Snapshot From: 02/16/2026 To: 02/16/2026 - Daily Snapshot		2/16/2026	Trade Date Basis	Cash Date Basis	
10175667	7547288	Finished	Export Snapshot From: 02/16/2026 To: 02/16/2026 - Daily Snapshot		2/16/2026	Trade Date Basis	Cash Date Basis

- **Classic FTP Compliance Test Results Process**

Outside of Data Hub, Sixth Street Partners receives a daily compliance test results file via FTP using a job set up in CDO Suite. Each day's file is saved for records. The job works as follows:

1. FTP job runs and creates an approved Trade Date Basis Portfolio Snapshot with an Interim Report classification for all deals in the job.
2. The compliance test results are derived from the most recent approved portfolio snapshot for each deal and:

- a. The Approved Portfolio Snapshot must have an As of Date on or before the date the FTP job runs.
- b. The Approved Portfolio Snapshot must not have a classification code of 'DPT' for the Daily Payment Report. This logic can be replicated in Data Hub.
